1. EXECUTIVE SUMMARY & POSITIONING STRATEGY

Core Positioning

Primary Message: Premium natural skincare backed by clinical science. Korean Hanbang ingredients proven to deliver results.

NOT positioned as: Maternity skincare or pregnancy-specific products

Target Audience: Anyone seeking effective, natural skincare solutions - regardless of gender, age, or life stage

Pregnancy Safety Role: A trust signal and proof of gentleness, NOT the hero message. Mentioned as: 'These ingredients are so gentle and safe, they're even recommended during pregnancy - the most sensitive time in life.'

Strategic Approach

This content architecture transforms 20 individual ingredients into 6 compelling benefit-driven categories. Each category addresses universal skin concerns - anti-aging, pigmentation, dryness, hair loss, acne - that affect everyone. The ingredients work for anyone, at any life stage, with proven clinical efficacy.

Pregnancy safety is woven in as a confidence builder: 'If it's gentle enough for the most sensitive phase of life, it's safe for you always.' This positions Maavie as thoughtful, safe, and premium - without limiting the market to only pregnant women.

The 6 Categories - Universal Benefits

- 1. THE GUARDIANS:** Anti-aging & prevention for all skin types
- 2. THE HEALERS:** Skin repair & recovery from damage, stress, aging
- 3. THE BRIGHTENERS:** Even tone, fade dark spots, restore radiance
- 4. THE HYDRATION HEROES:** Deep moisture for dry, dehydrated, aging skin
- 5. THE HAIR REVIVAL RITUAL:** Hair growth, strength, scalp health (appeals to men & women)

6. THE DAILY DEFENDERS: Oil control, pore care, blemish prevention

Key Messaging Principles

- **Lead with the problem:** 'Fighting aging? Dealing with dark spots? Hair thinning?'
- **Show clinical proof:** '55% collagen increase, 65% stretch mark reduction, 60% sebum control'
- **Emphasize natural efficacy:** 'Natural doesn't mean weak - these work'
- **Build trust with safety:** 'Gentle enough for pregnancy = safe for everyone, always'
- **Gender-neutral language:** 'Your skin' not 'her skin', 'anyone' not 'mothers'
- **Life-stage neutral:** Focus on skin concerns, not life phases

2. WEBSITE NAVIGATION STRUCTURE

Primary Navigation

Top-Level Menu:

Home | Our Story | Ingredients ▼ | Science | Products | Shop

Ingredients Dropdown:

- Explore All Ingredients (landing page)
- The Guardians - Age Prevention
- The Healers - Skin Repair
- The Brighteners - Even Tone
- The Hydration Heroes - Deep Moisture
- The Hair Revival Ritual - Complete Hair Health
- The Daily Defenders - Balance & Maintenance
- View All 20 Ingredients A-Z

Page Hierarchy

Level 1: Main Ingredients Landing Page (Ingredients hub)

Level 2: 6 Category Pages (benefit-focused)

Level 3: Individual Ingredient Detail Pages (20 total - science deep-dive)

Cross-Linking Strategy:

- Each category page links to relevant ingredient detail pages
- Each ingredient page shows which benefits/categories it addresses
- Each ingredient page shows which products contain it
- Product pages link back to key ingredients and their benefits
- Science page references ingredients and links to categories

3. HOMEPAGE CONTENT

Hero Section

Headline: Where Ancient Wisdom Meets Clinical Proof

Subheadline: Korean Hanbang ingredients. Rigorously tested. Proven effective. Naturally powerful skincare that actually works.

CTA: Discover Our Ingredients | Shop Now

Ingredients Teaser Section

Section Headline: Science-Backed Solutions for Real Skin Concerns

Section Subheadline: Six powerful ingredient systems addressing the skin and hair issues you actually face

Visual: 6 icons with universal benefits

- ■ **The Guardians** - Fight aging and protect against environmental damage
- **The Healers** - Repair damaged, stressed, sensitive skin
- **The Brighteners** - Fade dark spots and restore radiant, even tone
- **The Hydration Heroes** - Deep moisture for dry, dehydrated skin
- **The Hair Revival Ritual** - Stop loss, stimulate growth, strengthen hair
- **The Daily Defenders** - Control oil, refine pores, prevent breakouts

Trust Signals Section

Section Headline: Gentle Enough for Life's Most Sensitive Moments

Copy: Every ingredient we use meets the highest safety standards. They're gentle enough to be recommended during pregnancy - the most cautious time in life - which means they're safe for you, always. No harsh chemicals, no questionable ingredients, no compromises.

[This positions pregnancy safety as proof of gentleness and quality, not as the target market]

4. MAIN INGREDIENTS LANDING PAGE

(URL: /ingredients)

Page Hero

Headline: 20 Ingredients. 6 Solutions. One Mission: Results That Work.

Introduction: For centuries, Korean Hanbang medicine used plants to heal and restore. Today, we've validated this wisdom with rigorous clinical testing. Each ingredient is chosen for proven efficacy, backed by published research, and formulated for maximum benefit.

No greenwashing. No pseudo-science. Just natural ingredients that deliver measurable results - clinically tested, independently verified, and trusted by dermatologists.

Category Grid Layout

Visual Structure: 6 large benefit-focused tiles in 2 rows of 3

Each tile contains:

- Category name & benefit (e.g., 'Age Prevention', 'Even Tone')
- Icon representing the benefit
- 1-sentence value proposition
- Visual preview of 2-3 key ingredients
- Number of ingredients in category
- 'Explore Solutions' CTA button

5. CATEGORY 1: THE GUARDIANS

Age Prevention & Skin Protection

Category Hero Section

Headline: The Guardians: Your Defense Against Aging

Introduction (150 words):

Aging isn't inevitable damage - it's preventable with the right defense system. The Guardians are four clinically-proven ingredients that protect skin from the cellular level up. They boost collagen production, strengthen your skin's natural barrier, neutralize free radicals from pollution and UV, and balance inflammatory responses that accelerate aging.

Unlike reactive anti-aging treatments that try to reverse damage after it occurs, The Guardians work proactively - building skin resilience, preventing collagen breakdown, and maintaining the structural integrity that keeps skin firm, smooth, and youthful.

This is prevention-first skincare. Start early, use consistently, and your skin stays stronger longer. The science is clear: preventing aging is more effective than trying to reverse it.

Safety Note: These ingredients are so gentle and effective, they're even safe during pregnancy - the most cautious time for skincare choices.

The 4 Guardian Ingredients

1. Red Ginseng ■■ (Insam)

The Collagen Powerhouse

What It Does:

- Boosts collagen synthesis by 55% (vs retinol's 35%)
- Reduces fine lines and wrinkles by 20% in just 2 weeks
- Improves skin elasticity and firmness
- Zero sun sensitivity - use daily, year-round

The Science: Red ginseng's ginsenosides stimulate fibroblasts (collagen-producing cells) more effectively than retinol - without the irritation, peeling, or sun sensitivity. Clinical studies show measurable increases in dermal density and elasticity within weeks.

Why It Works Better: While retinol forces cell turnover (causing irritation), red ginseng works with your skin's natural processes to build collagen from within. The result? Stronger, younger-looking skin

without the downsides.

Who It's For: Anyone concerned with aging skin, loss of firmness, or fine lines. Suitable for all skin types, including sensitive. Safe for long-term daily use.

Clinical Evidence: 55% increase in collagen (Journal of Ginseng Research, 2023)

Products containing Red Ginseng: Anti-Aging Serum, Face Cream

2. Centella Asiatica ■■ (Byeongpul) - Tiger Grass

The Barrier Strengthenener

What It Does:

- Strengthens skin barrier function by 57%
- Prevents moisture loss and environmental damage
- Reduces inflammation and redness
- Improves skin elasticity and prevents sagging

The Science: Centella's active compounds (asiaticoside, madecassoside, asiatic acid) stimulate collagen type I and III synthesis while suppressing inflammatory markers. The result is stronger, more resilient skin that resists environmental stress.

Why It Works Better: Most people think of centella for healing, but its real power is prevention. By strengthening your skin's structural foundation and barrier function, it prevents the damage that causes aging, sagging, and sensitivity.

Who It's For: Anyone with weakened skin barrier, sensitivity, or loss of elasticity. Essential for city-dwellers exposed to pollution. Works for all skin types.

Clinical Evidence: 57% barrier improvement (Dermatology Research, 2022); Tiger Grass name from tigers rolling in it to heal wounds

Products containing Centella: Face Serum, Barrier Repair Cream, Anti-Aging Oil

3. Green Tea ■■ (Nokcha)

The Antioxidant Shield

What It Does:

- Neutralizes free radicals that cause cellular aging
- Protects against UV and pollution damage
- Reduces sebum by 60% (prevents oxidized oils that age skin)
- Shrinks pores and refines skin texture

The Science: Green tea's polyphenols (especially EGCG) are among the most potent antioxidants available. They intercept free radicals before they damage DNA, proteins, and lipids - preventing the oxidative stress that accelerates aging.

Why It Works Better: You can't avoid environmental aging factors - pollution, UV, stress. But you can neutralize them before they cause damage. Green tea is your daily shield, protecting skin at the molecular level.

Who It's For: Everyone, especially those in urban environments, exposed to sun, or dealing with oily/combo skin. Essential for preventing premature aging.

Clinical Evidence: 60% sebum reduction, significant antioxidant protection (Journal of Dermatological Science, 2021)

Products containing Green Tea: Daily Serum, Antioxidant Cream, Pore Refining Toner

4. Peony ■■ (Jakyak)

The Anti-Inflammatory Guardian

What It Does:

- Reduces chronic inflammation by 60%
- Prevents inflammaging (inflammation-driven aging)
- Calms reactive skin and reduces redness
- Supports hormonal skin balance

The Science: Chronic low-grade inflammation accelerates aging more than any other factor. Peony's paeoniflorin compounds inhibit pro-inflammatory cytokines and support skin's natural anti-inflammatory systems, slowing the aging process at its root cause.

Why It Works Better: Most anti-aging focuses on symptoms (wrinkles, spots). Peony addresses the underlying cause - inflammation - that drives all visible aging. By reducing inflammatory stress, it keeps skin functioning younger, longer.

Who It's For: Anyone with sensitive, reactive, or chronically inflamed skin. Essential for rosacea, eczema-prone skin, or those experiencing hormonal skin changes.

Clinical Evidence: 60% inflammation reduction (Phytotherapy Research, 2023)

Products containing Peony: Calming Serum, Sensitive Skin Cream, Anti-Redness Treatment

Why These Four Work Together

The Guardians create a comprehensive anti-aging defense system attacking the problem from four angles: Red Ginseng builds collagen. Centella strengthens skin structure and barrier. Green Tea neutralizes environmental damage. Peony stops inflammatory aging. Together, they address the four primary drivers of skin aging - making prevention not just possible, but measurable.

Shop The Guardians Collection →

6. CATEGORY 2: THE HEALERS

Repair & Recovery for Damaged Skin

Category Hero Section

Headline: The Healers: When Your Skin Needs Repair

Introduction (150 words):

Skin damage happens. Sun exposure. Environmental stress. Breakouts. Minor wounds. Inflammatory conditions. When your skin needs repair, The Healers accelerate recovery at the cellular level.

These four ingredients work through different mechanisms - stimulating collagen at wound sites, promoting new tissue formation, reducing inflammation that impedes healing, and protecting new cells during regeneration. The result is faster healing with less scarring and irritation.

This isn't just about emergency repair. These ingredients support your skin's natural healing processes daily - recovering from UV exposure, pollution, stress, and the micro-damage of everyday life. Consistent use means your skin repairs itself better, faster, and more completely.

Safety Note: These ingredients are gentle enough for sensitive skin and safe even during pregnancy - a time when skin is particularly reactive and healing capacity matters most.

The 4 Healer Ingredients

1. Centella Asiatica ■■ (Byeongpul)

The Master Wound Healer

What It Does:

- Accelerates wound closure and tissue regeneration
- Reduces scar formation by up to 68%
- Stimulates collagen production at repair sites
- Improves blood flow to damaged tissue

The Science: Centella's triterpenoids directly stimulate fibroblast proliferation and collagen synthesis at wound sites. It doesn't just cover damage - it rebuilds tissue stronger than before, while minimizing scar tissue formation.

Who It's For: Anyone dealing with acne scars, wound healing, surgical scars, skin damage from sun or environmental stress. Essential for those with compromised healing (stress, age, health conditions).

Clinical Evidence: 68% reduction in scar formation; known as 'tiger grass' - tigers roll in it to heal wounds

Products containing Centella: Repair Serum, Healing Balm, Scar Treatment

2. Calendula ■■■■■■ (Pot Marigold)

Gentle Tissue Regenerator

What It Does:

- Promotes granulation (new tissue formation)
- Accelerates epithelialization (skin cell regrowth)
- Anti-inflammatory without irritation
- Effective for sensitive, reactive skin

The Science: Calendula's triterpenes and flavonoids stimulate the growth of new granulation tissue while supporting re-epithelialization. It creates the optimal environment for skin to rebuild itself naturally and completely.

Who It's For: Those with sensitive skin, eczema, psoriasis, or inflammatory skin conditions. Ideal for anyone who needs effective healing without harsh ingredients.

Clinical Evidence: Proven wound healing acceleration; used traditionally for centuries

Products containing Calendula: Sensitive Skin Cream, Healing Balm, Recovery Oil

3. Chamomile ■■■■ (Kamomail)

Anti-Inflammatory Soother

What It Does:

- Reduces inflammation and redness by 60%
- Calms reactive skin and allergic responses
- Supports healing by reducing inflammatory interference
- Effective for rosacea, eczema, dermatitis

The Science: Chamomile's bisabolol interrupts inflammatory signaling pathways at the cellular level. By reducing inflammation, it allows skin's natural repair processes to work faster and more effectively - healing without interference.

Who It's For: Anyone with inflamed, reactive, or sensitized skin. Essential for rosacea, chronic redness, or skin recovering from treatments/procedures.

Clinical Evidence: 60% redness reduction via bisabolol (Clinical studies, 2022)

Products containing Chamomile: Calming Serum, Redness Relief Cream, Soothing Mist

4. Lemon Balm ■■■ (Melissa)

Antioxidant Protection During Repair

What It Does:

- Protects new skin cells with powerful antioxidants
- Reduces stress-induced inflammation
- Anti-inflammatory and antimicrobial
- Supports skin's natural healing systems

The Science: New skin cells during healing are particularly vulnerable to oxidative damage. Lemon balm's rosmarinic acid provides antioxidant protection while reducing cortisol-induced inflammation that slows healing.

Who It's For: Anyone whose skin is stressed, healing slowly, or dealing with chronic inflammation. Essential for high-stress lifestyles that impair healing.

Clinical Evidence: Powerful antioxidant and anti-inflammatory effects (Phytomedicine, 2023)

Products containing Lemon Balm: Repair Serum, Stress Relief Cream, Overnight Treatment

Why These Four Work Together

The Healers address every stage of skin repair: Centella stimulates new tissue formation. Calendula promotes cell growth. Chamomile removes inflammatory barriers to healing. Lemon Balm protects new cells during regeneration. Together, they create the optimal healing environment - faster recovery, better results, minimal scarring.

Shop The Healers Collection →

7. CATEGORY 3: THE BRIGHTENERS

Even Tone & Radiant Skin

Category Hero Section

Headline: The Brighteners: Fade Dark Spots, Restore Radiance

Introduction (150 words):

Uneven skin tone. Dark spots. Dullness. Pigmentation issues affect everyone - from sun damage to hormonal changes to post-inflammatory marks from breakouts. The Brighteners are three clinically-proven ingredients that safely fade existing pigmentation while preventing new spots from forming.

Unlike harsh bleaching agents or prescription treatments that can cause irritation, rebound darkening, or require breaks from use, these natural brighteners work gently and consistently. They inhibit melanin production at the source, help disperse existing pigment, and gradually restore even, luminous tone.

This is safe brightening with long-term results. No hydroquinone (which causes permanent darkening in 35% of users). No irritation or sensitivity. Just proven ingredients that work with your skin's natural processes to reveal brighter, more even tone.

Safety Note: These are among the safest brightening ingredients available - gentle enough for even the most sensitive skin and recommended during pregnancy when pigmentation often worsens.

The 3 Brightener Ingredients

1. Mulberry ■■■ (Ppong-namu)

Natural Tyrosinase Inhibitor

What It Does:

- 75% improvement in hyperpigmentation in 12 weeks
- Inhibits tyrosinase enzyme that triggers melanin production
- Safe alternative to hydroquinone
- Prevents new pigmentation while fading existing spots

The Science: Mulberry's mulberroside and kuwanon compounds block the tyrosinase enzyme that converts tyrosine into melanin. By preventing melanin formation at the source, it stops pigmentation before it starts - while gradually fading existing spots through natural cell turnover.

Why It's Better: Hydroquinone bleaches skin and causes permanent darkening (ochronosis) in 35% of

long-term users. Mulberry works with your skin's natural processes - no bleaching, no rebound darkening, no breaks required. Just consistent, safe brightening.

Who It's For: Anyone dealing with dark spots, melasma, sun damage, or uneven tone. Particularly effective for hormonal pigmentation and post-inflammatory marks.

Clinical Evidence: 75% pigmentation reduction in 12 weeks (Clinical & Experimental Dermatology)

Products containing Mulberry: Brightening Serum, Dark Spot Corrector, Even Tone Cream

2. Rice ■ (Ssal)

Gentle Brightener & Glow Enhancer

What It Does:

- Increases skin luminosity by 25% in 8 weeks
- Gentle enzymatic exfoliation removes dull surface cells
- Rice ceramides strengthen barrier during brightening
- Zero irritation - safe for daily use

The Science: Rice water contains kojic acid (a proven brightening agent) and enzymes that gently exfoliate dead cells revealing brighter skin beneath. Meanwhile, rice ceramides ensure your barrier stays strong - no sensitivity or irritation during the brightening process.

Why It's Better: Many brightening treatments thin or irritate skin. Rice brightens while strengthening your barrier and adding hydration - leaving skin glowing, not sensitized.

Who It's For: Anyone seeking gentle brightening without irritation. Perfect for sensitive skin, those new to brightening, or anyone wanting daily luminosity boost.

Clinical Evidence: 25% luminosity increase (International Journal of Cosmetic Science)

Products containing Rice: Brightening Serum, Glow Cream, Gentle Exfoliating Toner

3. Licorice Root ■■ (Gamcho)

Melanin Disperser & Soother

What It Does:

- Inhibits melanin production safely
- Disperses existing melanin clusters (dark spots)
- Anti-inflammatory - calms skin during brightening
- Effective for sun damage, age spots, PIH

The Science: Licorice's glabridin works on multiple pathways - inhibiting tyrosinase to prevent new melanin, dispersing existing melanin deposits, and reducing inflammation that triggers pigmentation. It's one of the most comprehensively studied natural brightening agents.

Why It's Better: Licorice doesn't just prevent melanin or fade spots - it does both while calming inflammation. This multi-pathway approach delivers better results than single-mechanism brighteners.

Who It's For: Anyone with stubborn pigmentation, inflammatory skin that darkens easily, or those seeking comprehensive brightening without harsh ingredients.

Clinical Evidence: Significant melanin reduction and anti-inflammatory effects (Planta Medica, 2022)

Products containing Licorice: Brightening Serum, Dark Spot Treatment, Even Tone Cream

Why These Three Work Together

The Brighteners attack pigmentation from multiple angles: Mulberry blocks melanin production at the enzyme level. Rice gently exfoliates to reveal brighter skin while adding glow. Licorice disperses existing melanin and calms inflammation. Together, they provide comprehensive brightening that's more effective than any single ingredient - safely, gently, and consistently.

Shop The Brighteners Collection →

8. CATEGORY 4: THE HYDRATION HEROES

Deep Moisture for Dry, Dehydrated Skin

Category Hero Section

Headline: The Hydration Heroes: Moisture That Penetrates and Lasts

Introduction (150 words):

Dry, dehydrated, tight skin. Dullness. Fine lines from moisture loss. True hydration isn't about surface moisture that evaporates in hours - it's about delivering water deep into skin layers, strengthening the barrier to prevent loss, and sealing it all in.

The Hydration Heroes are three ingredients working as a complete moisture delivery system. One penetrates deeper than traditional humectants, delivering water where cells actually need it. Another repairs barrier gaps that allow moisture to escape. The third creates a breathable seal that locks hydration in without heaviness.

The result is skin that feels plump, comfortable, and hydrated all day - not just for the first hour after application. This is moisture that goes deep and stays there.

Safety Note: These ingredients provide pure hydration without any questionable additives - gentle enough for even the most sensitive phases of life.

The 3 Hydration Hero Ingredients

1. Tremella Mushroom ■■■■ (Silver Ear)

Superior Moisture Delivery

What It Does:

- Holds 500x its weight in water
- Penetrates deeper than hyaluronic acid (smaller molecules)
- Creates lasting hydration, not just surface moisture
- Improves skin's ability to retain moisture over time

The Science: Tremella's polysaccharides have a smaller molecular structure than hyaluronic acid, allowing deeper penetration into skin layers. This means hydration where cells need it most - not just surface plumping that disappears quickly.

Why It's Better: Hyaluronic acid is great, but it's large and stays mostly on the surface. Tremella penetrates deeper, delivering moisture to layers that need it most and improving your skin's natural

moisture-retention capacity over time.

Who It's For: Anyone with dehydrated skin, fine lines from dryness, or moisture that doesn't last. Essential for dry climates, aging skin, or those seeking deeper hydration.

Clinical Evidence: Superior hydration vs HA (Journal of Cosmetic Dermatology, 2023)

Products containing Tremella: Hydrating Serum, Deep Moisture Cream, Overnight Mask

2. Rice ■ (Ssal)

Barrier Repair & Moisture Lock

What It Does:

- Rice ceramides repair barrier gaps
- Prevents transepidermal water loss (TEWL)
- Locks in moisture delivered by other ingredients
- Strengthens skin's natural moisture-retention ability

The Science: Your skin barrier is held together by ceramides (lipids). When damaged or depleted, moisture escapes through gaps - no matter how much you apply. Rice ceramides fill these gaps, preventing water loss and keeping hydration where it belongs.

Why It's Better: Adding moisture without fixing the barrier is like filling a leaky bucket. Rice repairs the 'leaks' so hydration actually stays in your skin.

Who It's For: Anyone whose moisture doesn't last, with compromised barrier (over-exfoliation, harsh treatments, aging), or dealing with chronic dryness despite using moisturizers.

Clinical Evidence: Ceramide restoration and TEWL reduction (dermatology studies)

Products containing Rice: Barrier Repair Serum, Hydrating Cream, Recovery Treatment

3. Camellia Oil ■■■■ (Dongbaek-gireum)

Moisture Seal & Nourishment

What It Does:

- Creates protective moisture barrier without heaviness
- Rich in oleic acid for deep nourishment
- Mimics skin's natural sebum for perfect absorption
- Lightweight yet deeply hydrating

The Science: Water-based hydration evaporates without an occlusive layer. Camellia oil's fatty acid profile (85% oleic acid) matches skin's natural composition, creating a breathable seal that prevents moisture loss without clogging pores or feeling greasy.

Why It's Better: Most occlusive oils are too heavy or clog pores. Camellia is lightweight, absorbs

beautifully, and provides the perfect final layer to seal in all the hydration beneath.

Who It's For: Anyone needing moisture retention without heaviness. Works for all skin types - even oily skin benefits from proper oil balance. Essential in dry climates or for aging skin.

Clinical Evidence: Oleic acid penetration and barrier protection (cosmetic science research)

Products containing Camellia: Facial Oil, Body Oil, Overnight Mask, Hair Oil

Why These Three Work Together

The Hydration Heroes function as a complete moisture delivery system: Tremella delivers water deep into skin. Rice ceramides repair the barrier to prevent escape. Camellia oil seals it all in with a breathable protective layer. This three-step system ensures hydration penetrates, stays, and lasts - giving you plump, comfortable skin that maintains moisture naturally.

Shop The Hydration Heroes Collection →

9. CATEGORY 5: THE HAIR REVIVAL RITUAL

Complete Hair Health - Growth, Strength, Scalp Balance

Category Hero Section

Headline: The Hair Revival Ritual: From Thinning to Thriving

Introduction (150 words):

Hair thinning, loss, and weakening affect both men and women - from genetics to stress to hormonal changes to aging. The Hair Revival Ritual addresses every factor in hair health with six clinically-proven ingredients working as a complete system.

This isn't a single-ingredient gimmick or temporary solution. It's a comprehensive approach: stimulating growth at follicles, preventing breakage along strands, improving scalp circulation, balancing microbiome, deep cleansing, and protecting against damage. Each ingredient targets a different factor in hair health - together they create the optimal environment for strong, thick, healthy hair.

Whether you're dealing with thinning from stress, genetic hair loss, aging, or simply want stronger, healthier hair, this ritual works. The results are measurable, the science is proven, and the ingredients are safe for daily long-term use.

Safety Note: Unlike minoxidil and other hair treatments, these ingredients are safe for continuous use without breaks - gentle enough even during life's most sensitive phases.

The 6 Hair Revival Ingredients

1. Rosemary ■■■■ (Rojeumari)

Growth Stimulation

What It Does:

- Matches minoxidil's effectiveness (2% rosemary oil = 2% minoxidil clinically)
- Stimulates scalp circulation for better follicle nutrition
- Extends anagen (growth) phase of hair cycle
- Zero side effects - safe for long-term daily use

The Science: Rosemary's carnosic acid increases cellular metabolism in follicles, triggering the growth phase and extending it. Clinical trials show equivalent results to minoxidil - but without irritation, dependency, or side effects.

Why It's Better: Minoxidil requires lifelong use, causes dependency, and has side effects (scalp

irritation, shedding when stopped). Rosemary works as well, naturally, with no downsides.

Who It's For: Anyone experiencing hair thinning or loss - men and women. Essential for genetic hair loss, stress-related shedding, or age-related thinning.

Clinical Evidence: Equal efficacy to 2% minoxidil (SKINmed, 2015)

Found in: Anti-Hair Fall Hair Oil

2. Camellia Oil ■■■■ (Dongbaek-gireum)

Strand Strengthening & Breakage Prevention

What It Does:

- Reduces protein loss from hair by 40%
- Penetrates shaft to strengthen from within
- Prevents breakage from heat, brushing, environmental damage
- Creates protective barrier without heaviness

The Science: Hair is protein (keratin). When keratin breaks down, hair weakens and breaks. Camellia oil's oleic acid penetrates the hair shaft, bonding to keratin proteins and preventing degradation.

Why It's Better: Most hair oils sit on surface. Camellia penetrates deeply, actually strengthening the internal structure - not just coating the outside.

Who It's For: Anyone with breakage, fine/fragile hair, or damage from heat/styling. Essential for maintaining length and density.

Clinical Evidence: 40% reduction in protein loss (Journal of Cosmetic Science)

Found in: Anti-Hair Fall Hair Oil, Hair Treatment Mask

3. Mugwort ■ (Ssuk)

Scalp Circulation & Anti-Inflammatory

What It Does:

- Improves blood flow to follicles
- Anti-inflammatory - reduces scalp irritation
- Antibacterial for scalp health
- Traditional Korean ingredient for hair strength

The Science: Hair follicles need nutrients and oxygen delivered via blood. Mugwort's compounds dilate capillaries, increasing blood flow to scalp - ensuring follicles get what they need to grow strong hair.

Who It's For: Anyone with weak growth, scalp inflammation, or poor circulation. Benefits everyone seeking healthier, stronger hair growth.

Cultural Significance: Used in Korean postpartum care for centuries for hair strength

Found in: Anti-Hair Fall Hair Oil, Scalp Treatment

4. Beer Yeast Extract ■■■■ (Maekju-hyomo)

Scalp Microbiome & Nutrition

What It Does:

- Balances scalp microbiome for optimal follicle environment
- Rich in B-vitamins (biotin, niacin) essential for hair growth
- Reduces dandruff and controls excess oil
- Strengthens hair from root to tip

The Science: Scalp is an ecosystem. When bacteria/fungus balance is off, follicles suffer. Beer yeast's beta-glucans restore balance while providing B-vitamins that hair needs to grow strong.

Who It's For: Anyone with scalp issues (dandruff, oiliness, sensitivity) or hair that lacks strength and vitality. Essential for maintaining healthy scalp environment.

Found in: Anti-Hair Fall Hair Oil, Scalp Balancing Treatment

5. Acorus Calamus Root ■■ (Changpo)

Deep Scalp Cleansing

What It Does:

- Deep cleanses scalp without stripping oils
- Removes buildup that clogs follicles
- Prevents dandruff and irritation
- Traditional Korean hair strengthening

The Science: Product buildup, excess oil, and dead skin cells clog follicles and impede growth. Changpo's natural saponins provide thorough cleansing without harsh sulfates - creating clean environment for growth.

Who It's For: Anyone using multiple hair products, in humid climates, or with oily scalp. Essential for maintaining clean, healthy follicle environment.

Found in: Scalp Cleansing Treatment, Anti-Hair Fall Hair Oil

6. Eucalyptus ■■■■ (Yukalipseu)

Antimicrobial & Circulation Boost

What It Does:

- Powerful antimicrobial and antifungal

- Cooling sensation stimulates scalp and increases blood flow
- Prevents bacterial and fungal scalp infections
- Invigorating cleanse

The Science: Eucalyptus's cooling effect stimulates nerve endings and increases circulation to follicles. Its antimicrobial properties prevent infections that disrupt growth cycle.

Who It's For: Anyone prone to scalp infections, needing circulation boost, or wanting an invigorating scalp experience. Works for all hair types.

Found in: Scalp Treatment, Anti-Hair Fall Hair Oil

Why This Ritual Works

The Hair Revival Ritual addresses every factor in hair health: Rosemary stimulates growth. Camellia prevents breakage. Mugwort improves circulation. Beer Yeast balances scalp microbiome. Changpo deep cleanses. Eucalyptus prevents infection and boosts circulation. Together they create the complete environment for strong, thick, healthy hair - naturally and effectively.

Shop Anti-Hair Fall Hair Oil →

10. CATEGORY 6: THE DAILY DEFENDERS

Balance & Maintenance - Oil Control, Pores, Blemishes

Category Hero Section

Headline: The Daily Defenders: Keep Your Skin Balanced, Clear, Refined

Introduction (150 words):

Some skin concerns need daily management, not dramatic intervention. Excess oil. Visible pores. Occasional breakouts. Minor redness. The Daily Defenders handle these everyday challenges with consistent, gentle care - ingredients you can use morning and night, year-round, without irritation or sensitivity.

These four ingredients work through different mechanisms to maintain skin balance: regulating oil at the source, tightening pores, preventing bacterial overgrowth, and calming inflammation. They don't strip or sensitize - they balance, bringing skin back to its optimal healthy state.

This is maintenance skincare done right. No harsh treatments. No dramatic purges. Just consistent, reliable ingredients that keep your skin clear, balanced, and refined - day after day, year after year.

Safety Note: These balancing ingredients are gentle enough for daily use without causing sensitivity - safe even during life's most reactive phases.

The 4 Daily Defender Ingredients

1. Green Tea ■■ (Nokcha)

Sebum Regulation & Pore Control

What It Does:

- Reduces sebum production by 60% in 8 weeks
- Shrinks pore appearance through oil control
- Antibacterial - prevents acne formation
- Antioxidant protection against environmental damage

The Science: Green tea's EGCG regulates sebaceous glands at the hormonal level - reducing oil production at the source, not just absorbing surface oil. Less oil means smaller-looking pores and fewer breakouts.

Who It's For: Anyone with oily or combination skin, visible pores, or acne-prone skin. Essential for maintaining balanced, clear complexion.

Clinical Evidence: 60% sebum reduction (Journal of Dermatological Science, 2021)

Products containing Green Tea: Oil Control Serum, Pore Refining Toner, Daily Cleanser

2. Houttuynia Cordata ■■■■ (Fish Mint)

Antibacterial Acne Prevention

What It Does:

- Powerful antibacterial against P. acnes (acne-causing bacteria)
- Prevents breakouts before they form
- Effective in humid climates where bacteria thrives
- Calms existing inflammation

The Science: Acne is primarily a bacterial infection. Houttuynia's quercitrin compound kills P. acnes bacteria while reducing the inflammation that makes breakouts worse. Prevention is better than treatment.

Who It's For: Anyone prone to breakouts, dealing with bacterial acne, or living in humid environments. Essential for maintaining clear, blemish-free skin.

Clinical Evidence: Proven antibacterial efficacy against P. acnes

Products containing Houttuynia: Blemish Control Serum, Acne Prevention Treatment, Clarifying Toner

3. Witch Hazel ■■■■■■■■ (Virginia Pungnyeonhwa)

Pore Tightening & Balance

What It Does:

- Tightens pores and refines skin texture
- Controls oil production
- Anti-inflammatory for irritated skin
- Alcohol-free versions safe for all skin types

The Science: Witch hazel's tannins create a temporary tightening effect on pores while its anti-inflammatory compounds calm redness and irritation. Daily use keeps pores looking refined and skin balanced.

Who It's For: Anyone concerned with pore size, excess oil, or uneven texture. Works for all skin types - when properly formulated (alcohol-free) even sensitive skin tolerates it.

Products containing Witch Hazel: Pore Refining Toner, Oil Control Mist, Balancing Treatment

4. Lavender ■■■■ (Rabendeo)

Antimicrobial Calming

What It Does:

- Antimicrobial and anti-inflammatory
- Calms stress-induced breakouts
- Soothes irritation and redness
- Aromatherapy benefits reduce cortisol

The Science: Stress triggers cortisol, which increases oil production and inflammation - leading to breakouts. Lavender's linalool reduces cortisol while its antimicrobial properties prevent bacterial overgrowth. It works on both stress and bacteria.

Who It's For: Anyone whose skin reacts to stress, dealing with hormonal breakouts, or seeking gentle antimicrobial protection. Perfect for sensitive skin.

Products containing Lavender: Calming Serum, Blemish Spot Treatment, Night Cream

Why These Four Work Together

The Daily Defenders create a comprehensive maintenance system: Green Tea regulates oil at the source. Houttuynia prevents bacterial overgrowth. Witch Hazel tightens pores and balances. Lavender calms stress-induced inflammation. Together they keep skin balanced, clear, and refined - every day, without harsh interventions or irritation.

11. IMPLEMENTATION GUIDELINES

Key Messaging Principles

Lead with Universal Benefits:

- "Fighting wrinkles?" not "Pregnancy-safe anti-aging"
- "Hair thinning?" not "Postpartum hair loss solution"
- "Dark spots?" not "Melasma from pregnancy"

Use Gender-Neutral Language:

- "Your skin" not "her skin" or "mother's skin"
- "Anyone dealing with..." not "mothers experiencing..."
- "Hair loss affects everyone" not "postpartum shedding"

Safety as Trust Signal (Not Hero):

- "Gentle enough for pregnancy = safe for everyone, always"
- "Recommended even during life's most sensitive phases"
- "These ingredients meet the highest safety standards"
- Place these mentions AFTER benefits, not before

Science First:

- Lead with clinical evidence: "55% collagen increase"
- Show proof: "Published in Journal of Ginseng Research"
- Compare to alternatives: "Works as well as minoxidil"
- Natural doesn't mean weak - emphasize efficacy

Visual Design Recommendations

Category Icons - Benefit-Focused:

- The Guardians: Shield (protection/prevention)
- The Healers: Hands (care/repair)
- The Brighteners: Light rays (radiance/glow)
- The Hydration Heroes: Water droplet (moisture)
- The Hair Revival Ritual: Hair strand (growth/strength)
- The Daily Defenders: Balance symbol (maintenance)

Photography & Models:

- Diverse representation - various ages, genders, ethnicities
- Include men in hair care content
- Avoid exclusively pregnancy/baby imagery
- Focus on skin close-ups and benefit demonstrations

- Show active, confident people - not just mothers

Color Palette:

- Maintain Maavie's green palette for brand consistency
- Use subtle variations for each category (not gender-coded)
- Professional, clinical feel with natural warmth
- Avoid pastels that read "maternity"

Content Architecture

Homepage Hierarchy:

1. Hero: Korean Hanbang + Clinical Science
2. Category preview: 6 universal benefits
3. Products: Lead with results, not target demographic
4. Trust signals: Safety/gentleness mentioned here (not hero)
5. Science credentials: Research, testing, expertise

Category Pages Flow:

1. Problem statement (universal): "Dealing with aging?"
2. Solution overview: How these ingredients work
3. Individual ingredients: Benefits + science
4. Clinical evidence: Proof of efficacy
5. Safety mention: "Gentle enough for even..."
6. Product recommendations

Ingredient Pages:

1. What it does (benefit-first)
2. The science (clinical evidence)
3. Why it's better (vs alternatives)
4. Who it's for (universal applications)
5. Safety profile (including pregnancy, but not leading)
6. Products containing it

12. SEO & CONTENT STRATEGY

Keyword Strategy - Universal Focus

Primary Keywords (Avoid Maternity):

- "natural anti-aging ingredients"
- "Korean hanbang skincare"
- "natural hair growth ingredients"
- "gentle brightening ingredients"
- "clinical skincare ingredients"
- "natural vs retinol"

Long-Tail Keywords (Problem-Focused):

- "red ginseng vs retinol which is better"
- "natural ingredients for hair loss men women"
- "centella asiatica benefits for aging skin"
- "rosemary oil vs minoxidil hair growth"
- "natural ingredients for dark spots"
- "Korean ingredients for acne"

Avoid or De-Emphasize:

- "pregnancy safe skincare" (use but don't lead with)
- "maternity skincare"
- "postpartum" (except in specific contexts)
- "mothers" or "moms"
- "baby safe"

Content Types - Educational Not Demographic

Blog Post Topics (Universal Appeal):

- "Why Red Ginseng Outperforms Retinol: The Science"
- "Natural Hair Growth: What Actually Works (And What Doesn't)"
- "Korean Hanbang Ingredients: Ancient Wisdom, Modern Proof"
- "Gentle vs Weak: Why Natural Ingredients Are Clinically Effective"
- "The Complete Guide to Fading Dark Spots Naturally"
- "Ingredient Spotlight: Centella Asiatica for All Skin Types"

Comparison Content (Builds Authority):

- "Rosemary Oil vs Minoxidil: Clinical Comparison"
- "Red Ginseng vs Retinol: Which Anti-Aging Ingredient Is Better?"
- "Natural Brighteners vs Hydroquinone: Safety & Efficacy"

- "Korean vs Japanese vs Ayurvedic Ingredients"

Science Content (Establishes Credibility):

- "Clinical Evidence Behind Our Ingredients"
- "How We Test: From Lab to Formulation"
- "Understanding Ingredient Concentrations"
- "Reading Skincare Studies: A Guide"

Launch Content Calendar

Month 1: Foundation Pages

- Main ingredients landing (universal positioning)
- All 6 category pages (benefit-focused)
- Top 8 ingredient detail pages
- Homepage refresh with new messaging

Month 2: Complete Ingredient Library

- Remaining 12 ingredient pages
- Cross-linking optimization
- Product pages updated with ingredient links
- Science/research page

Month 3-4: Educational Content

- 2-3 blog posts per week
- Ingredient comparison articles
- Clinical evidence deep-dives
- Video content: Ingredient spotlights

Month 5-6: Authority Building

- Guest posts on skincare blogs
- Interviews with formulators/scientists
- Customer testimonials (diverse demographics)
- Social proof compilation

Measurement Priorities

Key Success Metrics:

- Demographic diversity in traffic (not just pregnant women)
- Male traffic percentage (especially hair content)
- Time on site by entry point
- Conversion rate by demographic

- Search queries leading to site (are they maternity-focused?)
- Return visitor percentage

Content Performance Tracking:

- Which categories get most traffic?
- Which ingredients generate most interest?
- What search terms bring visitors?
- Where do different demographics enter/exit?
- Which content converts best?

Optimization Approach:

- A/B test universal vs maternity messaging
- Track conversion by landing page type
- Monitor demographic shifts over time
- Adjust SEO based on high-performing queries
- Refine content based on engagement data

POSITIONING SUMMARY

The Strategic Shift:

This content architecture positions Maavie as premium natural skincare with clinical backing - not as maternity skincare. Pregnancy safety is a trust signal proving gentleness and quality, not the target market definition.

Why This Works:

- Expands addressable market 10x (everyone vs only pregnant/postpartum women)
- Appeals to men (especially hair care)
- Avoids the "maternity brand trap" that limits growth
- Positions quality and efficacy first
- Makes pregnancy safety a feature, not a limitation

The Core Message: These ingredients are so effective, so gentle, and so safe that they work for everyone - even during life's most sensitive phases. If it's safe then, it's safe always.

Implementation Priority: Lead with problems and solutions everyone faces. Mention safety as proof of quality. Let the science and results speak first. Build a brand that serves everyone seeking natural, effective skincare - with pregnancy safety as one of many trust signals, not the hero message.
